

4 Get Control

Your SVS SB17-Ultra R|Evolution Subwoofer can be controlled from the SVS Mobile App or via the rear panel for maximum flexibility when optimizing performance based on your room layout, speakers, system set-up and more.

Download The App

The SVS App is the easiest and most convenient way to access all of the advanced control features available on your SB17-Ultra R|Evolution, from the comfort of your favorite seat.

For iOS, Android, & Amazon Devices

On The Subwoofer

The rear panel features an intuitive user interface with controls for adjusting the subwoofer's primary settings. The OLED display shows settings for Volume, Low Pass Frequency, Phase and more. Navigate the main menu by pressing the [⊙] button repeatedly until you reach the setting you wish to adjust. Use the up and down arrows to adjust the setting in real time.

Please note, some DSP settings can only be accessed using the SVS app, including: polarity, parametric EQs, room gain compensation, custom presets, and more.

5 Get Calibrated

Set the SB17-Ultra R|Evolution volume to -10dB on the App or via the rear panel, then run auto-set-up in the AV receiver/processor. It is important to re-run your receiver's calibration set-up if you are upgrading from another subwoofer and each time you move the subwoofer.

If your set-up doesn't include an Auto-EQ feature, adjust the subwoofer volume control to level-match to your loudspeakers.

For additional guidance on recommended crossover settings, visit our Subwoofer Matching Tool at www.svsound.com/merlin, or contact our support team.

Quick Start Guide

SB17-Ultra R|Evolution

Congratulations on choosing the SVS SB17-Ultra R|Evolution, one of the most powerful and advanced subwoofers in the world. We know you're anxious to start playing so the following steps will guide you through the quick and easy installation process.

We strongly recommend reading the SB17-Ultra R|Evolution Owner's Manual to get the best possible performance out of your new subwoofer. You'll find useful information about subwoofer placement, connections, DSP functions and more. The full SVS SB17-Ultra R|Evolution Owner's Manual can be found here: www.svsound.com/sb17-ultra-revolution-manual

Unbox It

If you followed the SB17-Ultra R|Evolution Subwoofer unboxing instructions properly you will have the following items in front of you. Please confirm all pieces are available before continuing.

[SB17-Ultra R|Evolution Subwoofer]

[Removable Grille]

[Detachable Power Cord]

Register Your New SVS Product:

Thank you for choosing SVS! Registering your SVS product expedites any Sound Experts support requests, confirms your warranty registration and provides a proof of purchase. Plus, as a registered customer, you'll be the first to get SVS news and updates.

2 Set It Up

The location of your subwoofer in the listening environment can affect its performance. If possible, start with corner placement on the same wall as the front speakers, or anywhere along the front stage in between or outside of your main speakers.

Corner Placement: offers huge impact and reduces the potential to encounter bass nulls, or 'dead spots'. If "boominess" occurs, you can try pulling it away from the wall and using the DSP tuning controls to smooth performance.

Front Placement: In between or to the side of the front channel speakers often results in the best blending with the main speakers and center channel and minimizes localization effects.

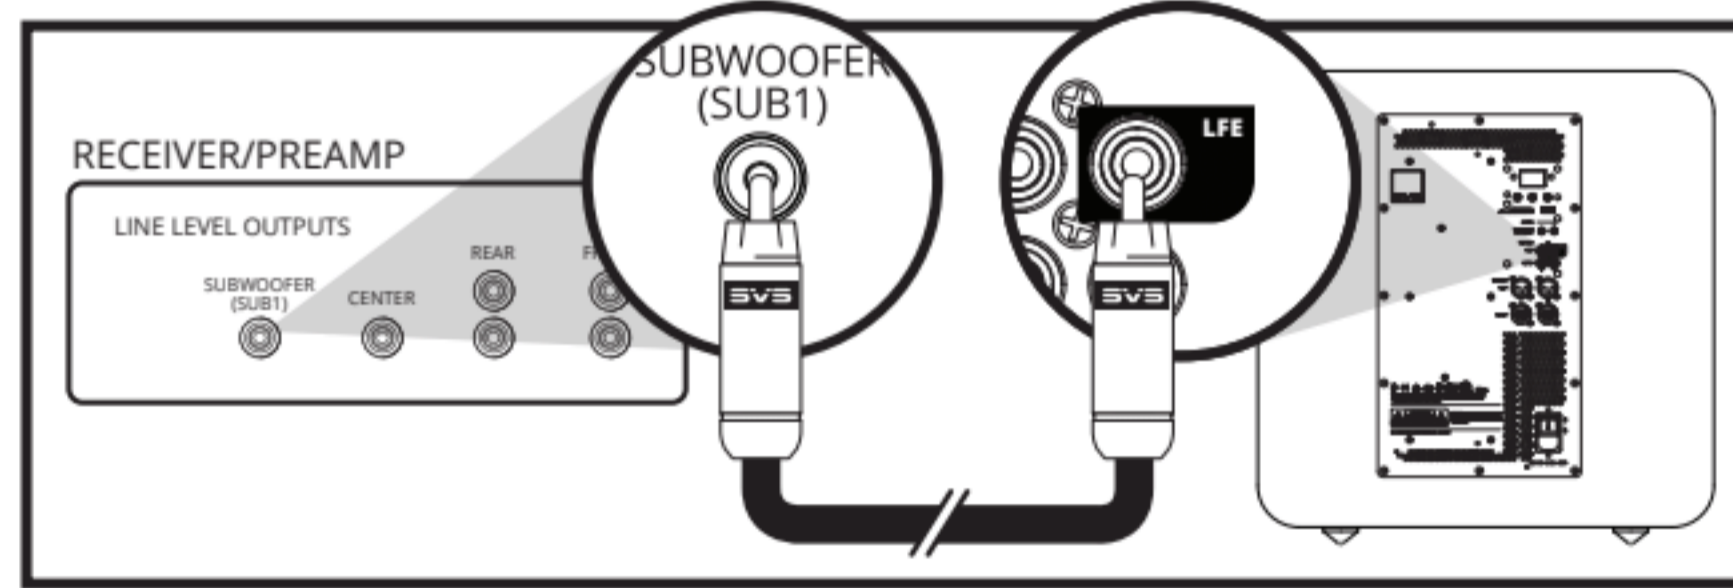

Side Wall Placement: Side wall placement is less frequently used but can be an effective subwoofer location for excellent accuracy and output.

3 Hook It Up

For most set-ups, a single RCA subwoofer interconnect cable running from the AV Receiver's "SUB 1" output to the SB17-Ultra R|Evolution's "LFE" line level input is all that's required to connect the subwoofer into your system. If you run separate Pre-amplifier and Power Amplifiers, follow the "Line Level Connection - Stereo Receiver or Pre-amplifier Left/Right Channels" connection guide below.

Line Level Connection - Single LFE Channel

Line Level Connection - Stereo Receiver or Pre-amplifier Left/Right Channels

Need Help?

Our support team is standing by to help with subwoofer placement, installation, calibration, AV receiver settings, room rattle and anything else. Just call, email or chat online 7-days-a-week.
