

VicStudio Box

PROFESSIONAL AUDIO

Description

At Vicoustic, we understand that every home studio will always be a compromise between the available budget and the ideal case-scenario. And this should also not limit the visual aspect of the room, as a comfortable environment is the basis of productivity, whether you're composing, mixing, mastering. For these reasons, Vicoustic has developed VicStudio Box - Acoustic Treatment Kit.

Combining some of our most popular products in an easy to use and install package, a home studio user can start with 1-3 boxes depending on size of the room and get everything required to get a treated studio that will sound great and look even better.

Consisting of one single box containing 8 units Wavewood Ultra Lite, 2 units Multifuser DC2 and Flexi Glue Ultra to install it all, VicStudio Box is an acoustic kit appropriated to treat your Project Studio. Depending on the goals and/or the available budget for the room you may acquire one or several boxes.

Acoustic solutions will always have a visual impact. The aesthetics of your home studio are an important factor for your comfort and, consequently, for the work you carry out inside of the room - which is likely to involve long hours and to require a lot of concentration. The VicStudio Box can be acquired in three different finishes, so that you have more options available when it comes to deciding the look you want for your room.
