

Pendant Kit

Pendant Kit

The optional pendant kit allows the BCS250 and BCS300 to be transformed into a point-centered hanging pendant design, providing installers with ultimate flexibility to interchange between the two mounting options to accommodate for any type of infrastructure. Featuring an elegant, lamp-shaped enclosure, the pendant design can serve as a hanging fixture in scenarios where audio needs to be brought closer to a listening height, especially in the case of high and/or exposed ceilings.

- Each kit includes a hook, cap and pendant housing
- Available in Matte Black and Matte White
- Black Pendant Kit also includes a Black grille
