

WS500 & WS300 in-wall loudspeakers

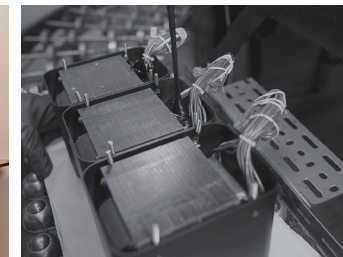

- The WS500 and WS300 In-Wall Loudspeakers are versatile speakers suited for custom install applications in both 2-channel audio and home theaters.
- Voice matched to each other for a seamless and cohesive aural experience. Also voice matched to the CS200 In-Ceiling Speaker to further expand your audio experience.
- Both are fully enclosed to deliver incredible performance in any environment. A controlled air chamber minimizes distortion and response irregularities.
- Each uses a long throw, high power shallow design woofer that fits in standard 2x4 wall construction for easy installation.
- The midranges and tweeter are the same drivers used in many of our home audio speakers, meaning you'll receive the same high level performance from the WS500 and WS300 as from our home audio speakers.
- The grilles magnetically attach for easy removal. The grilles come with a white finish but are paintable and will leave little to no visible edge of the mounting flange so the speakers can virtually disappear into their surroundings.
- Combine them with our MI128 and MI254 distribution amplifiers for room filling sound.
- Rough-in kits available.
