

The BOREA BRS1 are effects speakers specially designed to reproduce surround sound tracks in a home cinema setup. Be totally immersed in your films and TV series thanks to an enveloping sound that reproduces details and sound effects at 360°.

The selector on the rear of each speaker makes it easy to choose the desired configuration: bipolar mode for uniform 5.1 surround sound and dipole mode for optimum spatialization in advanced configurations.

The BRS1s inherit BOREA technologies and form a harmonious combination with the other speakers in the range.

The 16cm natural cellulose pulp cone driver delivers faithful reproduction of voices and wide sound coverage. Its dual 25mm EFS silk dome tweeter delivers warm, accurate sound throughout the room.

Its shallow depth and simplified wall mounting make it easy to integrate. The speaker is supplied with a damping system to decouple the speaker from the wall and ensure easy cable routing.

With the BRS1, you'll be able to experience the thrills of a cinema, right in the heart of the action.
