

Streaming Audio Player

The Next Generation of Streaming Audio

XSTREAM™

Control with XTS In-Wall Touchscreen or MyRussound App for iOS or Android

The XSource Streaming Audio Player is a multi-use streaming media solution with a tiny form factor for easy integration with external amplifiers or whole-house receivers.

Designed for scalability, the XSource includes native support for high resolution audio, and the full complement of sources available in all of Russound's XStream series of products. The XSource also supports playback from connected USB storage devices.

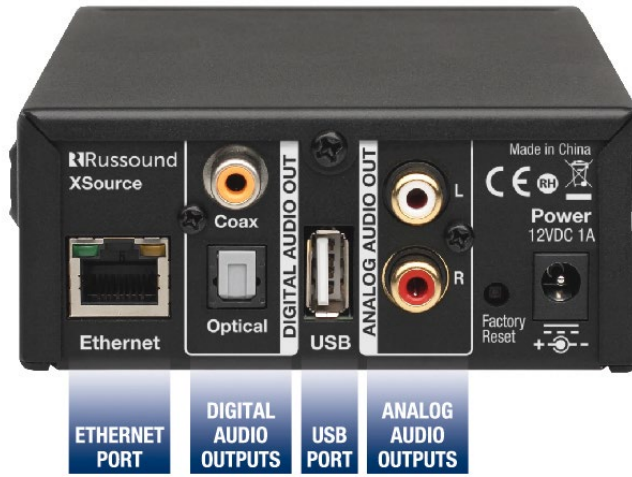

XSource can be integrated with other XStream series components, Russound MCA-Series and C-Series controllers, or can operate as a stand-alone streaming source that can be used alongside any amplifier or multiroom

audio system. It offers both analog and digital outputs as well as built-in Ethernet connectivity. The innovative built-in clip allows the physical coupling of multiple units. Couple four units together to fit a standard 17" rack width.

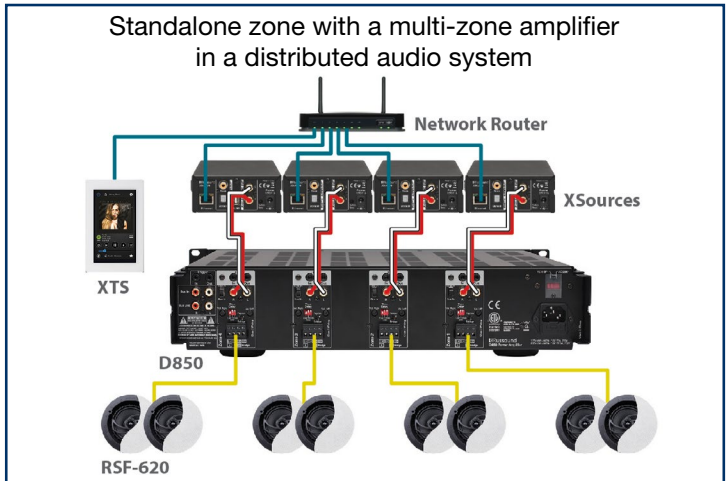

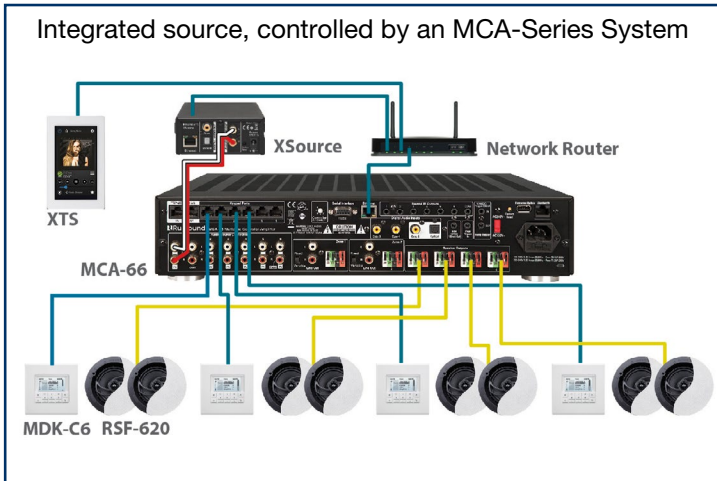

Streaming Sources: Spotify, Pandora, SiriusXM, SiriusXM Business, AirPlay, TuneIn, vTuner, DLNA.

Features

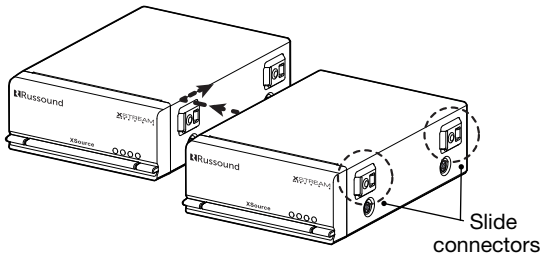

- Integrate a streaming source into any MCA Controllers
- Connect to any amplifier or receiver as a streaming audio source
- Control via the MyRussound™ App or XTS in-wall touchscreen
- Mix and match with other Russound XStream Series products for up to 16 streaming zones
- Built-in Slide Lock System allows coupling of up to 4 units in a single rack width

ETHERNET PORT **DIGITAL AUDIO OUTPUTS** **USB PORT** **ANALOG AUDIO OUTPUTS**

Installation Options

Slide Lock System

You can connect multiple XSources by using the integrated slide connectors as shown.

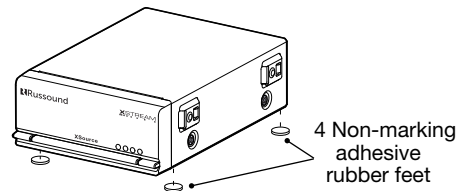

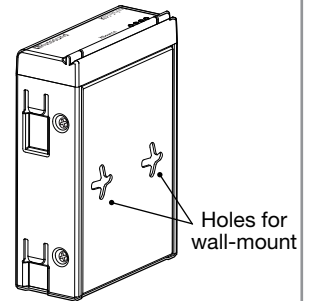

Table-mount

For table-mount use the rubber feet (included)

Wall-mount

For wall-mount use the mounting holes on the bottom of the unit.
